## 1. Wiener Neustadt (O 48/X 34) airfield.

On 13 May 1952, a newly erected radar set was observed south of the Wiener Neustadt-Bad Fischau road. The set consisted of a dipole support, about 4 meters long, with 7 dipoles and a mast, about 8 meters high, having a lower section fitted between two wooden pegs, while the upper section was bifurcated. Each dipole had a wire leading to the mast and from there to the low wooden building east of the radar set. The mast was braced by four guy wires of which only two were fitted with insulators. (1) On 14 and 15 May, flying began at 5 a.m. Between 4 and 4:30 p.m. on 15 May, a twin-engine, low-wing monoplane was parked in a hangar of the Theresienfeld aircraft repair shop. Five twin-engine, low-wing monoplanes with double rudder assemblies and a twin-engine, low-wing monoplane with single rudder assembly were observed in front of the hangar.

50X1-HUM

(1) The radar set is a RUS-2 type. The present location of the Dumbo type set which was previously located there is not known.

(2) The occupation of Aspern airfield has not changed [redacted] Two bomber regiments are believed to be stationed there. One of these regiments was stationed in Strasshof up to April 1952. 50X1-HUM

(3) Goetzendorf airfield is still occupied by a bomber regiment.

(4) The number of single-engine jet fighters has slightly diminished at Strasshof airfield since the last report when 48 planes were observed there.
